

12A River Detectives Report – 4/11/22

Considering it had been 4 weeks since the Water Cycle incursion, it was great to see many students retaining much of the information that was imparted to them on this day.

Mrs. Batty and Mrs. Ryan went down to Kororoit Creek at 8am this morning to take a water sample from the creek at the end of Norwood Street.

Students from 34C looking for water bugs in the trays, water samples from Kororoit creek.

Six different Water Bugs were found in the water sample, they include - pogs, fly larvae, water pennies, damselfly larvae, glass shrimps and water treaders.
