Sustainability update – February 2022

- Continuing to work towards our 5-Star Sustainability rating as a *ResourceSmart School* (RSS) and *Ec0-Schools Litter Legend Campaign.*
- Core, Waste and Biodiversity modules are complete.
- We received our third star for the Waste module. It is on display in the foyer of the school.
- This year Mrs Ryan is working with a different class each week on sustainability. Each class will work one a term on the focus area. The focus in term one is 'waste and litter.' When it is their class's turn, students will conduct a litter audit of the school grounds and one selected bin and tally the data. This data will be used in math classes and to show how we are going in our fight against litter and waste at Albion PS. There will be other initiatives introduced to students throughout the year.
- Water module is 91% complete, with three compulsory actions required
- Energy module is 90% complete, with two compulsory actions required.
- All five modules must be 80% complete to get our 4th and 5th stars.
